Hans favoritämnen i skolan är historia, geografi, sociologi, biologi och fysik. Vinicius har mild laktosintolerans.

Hello!

My name is Vinicius, as i write down this letter im 17 years old. I live with my parents and my two younger brothers.

Well, I am a excited, talkative and extroverted person who really enjoy all types of activity and indoor/outdoor programs. Im really into sports like Handball, Football (soccer), Basketball, Hiking and Jogging... I am a very physically active person.

I'm into books, music (like pop, rock, jazz and blues), philosophy, sociology and all the types of discussions about the world, as long the discussion is healthy. I'm into politics too. I'm always open-minded to listen and understand others visions.

Regarding routines, I have a little difficulty adapting to new routines, this adaptation takes a little time to happen. However, my curiosity and desire to know the world and live all possible experiences help me feel comfortable in situations that are of the day-by-day life and never-before-seen surroundings.

All my school life I woke up early (06:30am) to go to daycare, primary school and so on... I am adapted to the most different school experiences and I am used to interacting and relating to my classmates and school friends. I like better subjects that encourage an good and healthy coexistence among students. I'm looking forward to setting up my schedule with the most varied choice of subjects and experiencing everything that the academic background can offer me.

Therefore, I hope to have the best family, personal and student experience that an exchange student can have in Nordic lands. I'm looking forward to getting to know and integrating, in a certain way, Swedish culture. I hope to meet my host family as soon as possible, i'm sure it will be a relationship of great respect, affection and, above all, massive knowledge.

Kind regards,

Vinicius
