

"Jakob is among the top-performing students in his class and continuously demonstrates a willingness to learn and improve."

Lär känna Jakob

Jakob är född 2008 och kommer från Tyskland. Han kommer i augusti 2025 och stannar under en termin. Intressen är bl. a gymträning, sport (även fotbollsdomare), kyrkoaktiviteter, musik (spelar gitarr) och språk. Hans favoritämnen i skolan är franska och idrott.

Hello, I'm Jakob!

I truly appreciate your kindness in welcoming me as a new member of your family and home! I'm 16 years old and go into the 10th grade in a Gymnasium. I really like French and PE at school. In my leisure time I like to go to the gym and train. I also play the guitar, which I play since 2 years. I also like to hang out with my friends and to go outside. I have a very big friendgroup. We consist out of 12 people and we do everything together. We actually were in Croatia together for 12 days with a youth travelling organisation which was pretty exciting and we had a lot of fun. This year in summer we will repeat this whole adventure and go to Croatia again. I like soccer as well, therefore I am referee assistant for the local men league. I was playing football for 3 years as well but I did not enjoy playing anymore. My day consists of getting up, going to school, cooking for me and my dad because he works at home, cleaning the house, going to the gym, maybe meeting up some friends, doing some homework and other school stuff and then of course going to bed and sleep. I would describe myself as a very open-minded guy who likes to learn new things and can openly and self-reflected talk about his feelings. I have my problems to approach people but when I'm feeling comfortable with them I can talk like a waterfall. I've also a passion for languages. I speak pretty fluent english and I'm very good in french at school. I also got a interest in my religion. That's why I often go to church on sundays. I dream about being an orthopaedist when I'm older. The thought about helping someone after a car crash, an accident, which happened during sport activity or saving someone's sport career is really inspiring to me. Therefore I want to study medicine when I'm older to become an orthopaedist.

I live in a house with my family, which is my mother and my father. My brother also lived at home but he moved out for studying 1,5 years ago. Me and my family like to travel a lot. We were in so much different countries like the USA, Spain, France, Italia and much other european countries.

The decision to go to Sweden for a semestre came from the interest to sweden that I got when I was on vacation in sweden with my family. I was maybe 9 or 10 years old back then and it was one of the most fascinating vacations I've ever had. The scenery, the way of living, the food, everything has caught me. Of course I was also a little bit influenced by my parents that can both speak a good amount of swedish because they learned it in university. They were often in Sweden while studying and they talked a lot about their unique experiences they had there. They have lost their heart especially in Gotland.

I hope for that exchange semestre that I can learn the way of living in Sweden and not just the view of a tourist, find new friends, learn the swedish language and have an adventure that is memorable. But I also want to benefit my host family and the school I will go to. I want to be helpful at the home of my future host family and integrate myself. 2 years ago I've got some international experiences already because I was in France for a student exchange, which was for 2 weeks.

I'm totally excited to go to Sweden and to become a high school student there and I'm so excited to meet you as my host family! See you soon,

Jakob!
