

**"Luke is affable and works well with others to get tasks done."**

## Lär känna Luke

Luke är född 2008 och kommer från USA. Han kommer i augusti 2026 och stannar under ett läsår. Intressen är bl. a teckna/måla (även digitalt), böcker och utomhusaktiviteter.

Hello Swedish family!

My name is Luke and I am from the USA. Sorry, but I can't speak much Swedish but I like to study it. I like many things: reading, walking, exercising, listening to music, animals, and watching movies or TV. I also like to try new things. I think I am a lively and friendly person. I like talking to people. I want to be a nurse or a teacher, maybe, because I want to talk to and help others and I want to work with an important job like that. I also like to be outdoors. I like to go camping and hiking. In the summers I work at a summer camp. It is a lot of fun to play, swim and paint there. I like people who are optimistic and care about others because I think they are important for happiness.

I want to come to Sweden because I have studied the language in school, I like the cold and the snow, and I want to experience the culture. I am interested in the Swedish culture because I like values like acceptance and balance. I am also interested in schools and high school because I am passionate about education; I would like to talk about working in childcare for over a thousand hours! I hope to improve my Swedish and become more familiar with the country so that I can maybe live there in the future or experience another culture. I want to try many new things because I think it is important so that you can live your best life. I also hope to show you the USA and my life. I would like to compare the schools, cultures and other things with you, I think it is very interesting. I also like Swedish food, like lingonberries, fish and crispbread. I like most food but I don't just like coffee.

Right now I go to a small university and live in a dormitory. I usually wake up early, around 6:00, and work out. Then I shower and get ready and go to my first class. I have two courses in geography, one in psychology, one in medicine and a Swedish course. I like school a lot so I take two more courses than I need. After school I eat and study. Then I do something fun like painting, listening to music or reading. I tend to be quite independent, but I am not an introvert. I hope to go to a similar school in Sweden. Now I only have about a month left until summer.

I hope to find a family who likes to share ideas and wants to live a nice life. I also think that contact with other people is part of this, and it is more fun. I don't need to live in a big city or in a quiet house, just a family who wants an exchange! I know there is so much to learn. I can't wait to hear more about you and talk more about the fall. Thank you so much!

Kind regards,  
Luke
